DETAILED ACTION

This office action is in response to the amendment filed December 5, 2001.

Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 11-17 are drawn to a device, classified in class 257, subclass 778.
- II. Claims 9 and 10 are drawn to a method, classified in class 438, subclass 108.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process can form a bonding layer without a space formed within, or in the alternative the bonding layer could simply be a matrix type composition wherein no pressure or heat is needed to form a space within the layer.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
